

Week 4 – Dress Up Theme – Fairies

There were fairies flittering in and around the Sports Hall this morning. The weather stopped the Playgroup/KindylinQ group from frolicking outside, so with a sprinkle of fairy dust, the Sports Hall hosted activities galore. The children could play with a fairy garden, make magic slime, paint their own wings, build a magic wand with pipe cleaners and beads, and create their own little fairy creature. Our session concluded with a rhyme, *"Five Little Fairies Jumping on the Bed,"* and the story, *"The Fancy Dress Ball,"* written by Lisa Ann Marsoli, whilst we enjoyed our morning tea. Ms O'Connor had a fairy game to play afterwards. Our young learners were encouraged to move to the music and follow the instructions then find a fairy to complete a breathing activity. Lots of fun was had for all our families who attended this morning.

Week 5 – Dress Up Theme – Construction/Builder

It was a beautiful day to join in with Playgroup/KindylinQ. The weather was in our favour and the dress-ups this week was as construction workers or builders. The Sports Hall had an array of toddler-inspired offerings to satisfy our eager clientele. There was a workshop set up to fix broken toys or create broken toys. The children were able to dress up accordingly from our dress-up corner and then build towers safely with the cardboard boxes. Of course, once we had built our towers, we needed to knock them down and started all over again. There was a tough tray filled with different cereals for the construction machines to explore. The young learners could chose from these craft activites - printing with tools, then printing with legos and gluing

on construction cones. Lastly, there were marshmallows and toothpicks to build 3D shapes, and felt shapes to make different trucks pictures. Our session concluded with a rhyme, *"Johnny Works with One Hammer"*, and the story, *"A Duck Called Brian,"* written by Al Murphy. Our Playgroup/KindylinQ families had a visit from our Chaplain – Chappy Carly, this morning as well.
