

# Kurwongbah Kids PLAYGROUP

## Week 8 – Winter

Our Kurwongbah Playgroup was all a buzz with busy young learners today. We were hit with the hot weather again, but our Sports Hall held up with its large fan to cool the group down. Our theme involved Winter learning with two craft activities of creating a rock penguin and printing bubble-wrap, snow art onto tree templates. Mrs Owen, one of our science teachers, came as a special guest today. She provided weather experiments that were really cool. We saw water tornadoes in large recycled plastic bottles. The other experiment was dropping colour onto shaving cream to watch how the “clouds” reacted or changed their colour. Thank you, Mrs Owen.

## Week 9 – Cool Days

We welcomed two new families to our community and it was a busy group of fun explorers in the Prep playground this morning. Our craft items this week involved paddle pop octopi and ripped paper rainbows. These two activities were quite popular amongst the young learners. The Sports hall had an obstacle course, Paw Patrol character toys and our usually home corner and ball pit which the children were engaged in imaginary play. Our story this week was called, “Bamboo, Velvet and Beak – The Rainbow,” by Felicia Law. This story explained how rainbows were created with the sun shining through raindrops. However, the character Bamboo liked them being made from magic. So, we wish you all a magical week!
